

Catch()

classmate

Date _____

Page _____

What to write in a Catch() block?

- Put Recovery Code in there. (Handler Code)
- It's a place to write code to handle the impact of Unwanted event occurred due to exception.

```
try {  
    Code-1;  
}  
Catch (Exception e) {  
    • Recover if Code-1, failed  
}
```

Recover/Handle :- Recover from the impact of the event.

"Let's understand this through java Code."

Multiple Catch blocks

- * It's allowed to write multiple catch blocks for 1 try block
- * The order of catch blocks is important.

```
try {  
    Poor Health;  
}  
catch (Fever) {  
    Medicine-1;  
}  
catch (Headache) {  
    Medicine-2;  
}  
catch (Cold) {  
    Medicine-3;  
}
```
